PM3-to-MAX Migration

We recently announced that Lucent will no longer develop and sell the PortMaster® 3 Access Concentrator*. We know you loved the PM3; it was a great product. However, as customers demand a wider range of services from their remote access devices, we now are focusing our development efforts on the MAX™ family of products. With the powerful i960 processor and enhanced memory provided by the MAX 3000 and MAX 6000 access switches, these are the perfect platforms for deploying enhanced multiservice offerings.

We are currently offering two programs to assist with the transition to the MAX family of products.

Lucent Trade-in, Trade-up Program. You can trade in your current PM3 equipment towards the purchase of a MAX 3000/6000, MAX TNT®, or APX 8000™ WAN access switch, and receive a rebate of up to $90.00/port.

First-time Buyers Program. If you have no plans to trade in your equipment, you can still take advantage of our MAX First-time Buyers Program. First-time MAX 3048, MAX 6096, customers are eligible for a rebate up to $1,000.

For more details on both programs, visit http://www.lucent.com/ins/salespromotions/

The matrix that follows lists the differences between the PortMaster 3, MAX 3000, and MAX 6000 products. If you have any questions on how the MAX 3000 and MAX 6000 compare with the PM3, please give us a call at 1.800.621.9578 Option 3.

Common Features/Options	PM 3	MAX 3000	MAX 6000
Maximum Modems Box T1/E1	48/60	48/60	96/120
Rack Height	2 RU	1 RU	3 RU
