

Share DSL, cable modem, or ISDN router

Plug'n'Play installation

Always-on broadband Internet access

Symphony-HRF Cordless Gateway

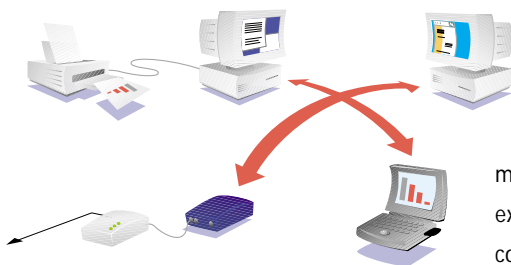

*Simple, Reliable Home and Small Office
Computer Networking Without Wires*

Wirefree Broadband Internet Access to All Your PCs

Enjoy the benefits of your high-speed Internet connection, and have access to it from any of your PCs—all without messy wires or drilling holes in walls. With the Symphony-HRF Cordless Gateway you can connect your broadband Internet service and your PCs together, no matter where they are in your home or office.

Save Money, Save Time — Share One Internet Connection Simultaneously

End the conflict of multiple people trying to access the Internet simultaneously. The Symphony-HRF Cordless Gateway enables

multiple people to share one ISP account through a cable modem, DSL modem, ISDN router, or existing Ethernet LAN connection. This means

you and your family can explore different websites at the same time for the price of just one ISP connection.

The Convenience of Always-On Access

Because the Symphony-HRF Cordless Gateway plugs directly into your DSL or cable modem, you have instant, high-speed access to the Internet. This means no waiting to boot up another computer before getting online.

HomeRF Standard Compatibility for Long-Lasting Value

Symphony-HRF is built to the HomeRF standard, which is backed by the industry leaders in the computer and communications fields. HomeRF is the only standard that delivers reliable data communications today and compatibility with voice systems for the future. Utilize HomeRF devices to ensure interoperability and long-lasting value.

Built-in Firewall for Additional Security

Protect your computers from unwanted intruders off the Internet. The Symphony-HRF Cordless Gateway includes a built-in firewall to insulate your network from unauthorized access.

No Networking Expertise Required

Symphony-HRF takes the hassle out of setting up your home or small office network. From start to finish, you are guided through the installation—no networking expertise is required! If you have an existing Ethernet or phone line network, Symphony-HRF can seamlessly extend it.

Features

- Share a single, high-speed Internet connection
- Reliable, wirefree communications
- Stand-alone unit, two connector setup

Benefits

- Reduce the cost of having multiple PCs accessing the Internet
- No hassles with wires or where your wall jacks are located
- No PC to leave on all the time to access the Internet
