

Do You Sell Cisco Routing Solutions? Do You Sell Managed Services?

If the answer is yes to either of these, then you should also be selling the **USRobotics Courier modem** for out-of-band communications.

USRobotics Courier modems provide an ideal solution for Out-of-Band network management providing:

- A secure path to manage a remote network, without interfering with normal traffic
- An alternative route into equipment for maintenance, management and trouble diagnosis
- An extremely cost effective way to perform contracted network management or support managed Services networks

Proven Success - One Enterprise Company

- Shipped up to 4000 modems per year for the past 8 years
- Zero failure rate to date
- Worldwide Remote access to their Cisco Router network

Key Applicable Courier Features

- Dial Back Security – Remote modems will only dial-back into pre-programmed management locations
- Hardware “Multi-Switch” – Execute Stored Command function to allow remote personnel to reset to planned configuration
- V.Everywhere/Global Reach – Provide remote management globally if needed
- Remote Management/Flash – Network changes, modem updates and tweaks are done from a central site
