

TAOS Software Release Announcement

TAOS 10.1.0 for the MAX™6000, MAXTNT®, APX1000™, APX8000™ and APX8100™ Universal Gateway Platforms

April 2, 2003

Starting April 2, 2003, the TAOS 10.1.0 software for the MAX™6000, MAXTNT®, APX1000™, APX8000™ and APX8100™ Universal Gateway platforms will be made available to entitled users and customers globally.

Details on key enhancements delivered with TAOS 10.1.0 are available from the TAOS release notes available at: http://www.lucent.com/taos (product documentation section).

Software upgrades to the TAOS 10.1.0 software and subsequent releases and updates (e.g., TAOS 10.1.1) for the MAX™6000, MAXTNT®, APX1000™, APX8000™ and APX8100™ platforms are available exclusively through Lucent Worldwide Services as part of an annual RTS Advantage service contract. Lucent Worldwide Services can provide detailed pricing and feature information for the **RTS Advantage** service as it applies to MAX™6000, MAXTNT®, APX1000™, APX8000™ and APX8100™ Universal Gateway platforms.

The TAOS 10.1.0 software files are available to entitled customers from the Lucent Online Customer Support website. Additional support may be obtained by contacting Lucent Worldwide Services local TAC personnel.

Please note that the MAX™3000 Universal gateway platform is not supported in TAOS 10.1.0.

Additional information about TAOS may be found at: http://www.lucent.com/taos

If you have any questions or comments about the TAOS 10.1.0 software release notes, please send an email message to Technical Publications.
