

Model No. 5600

Key Benefits

Designed and manufactured specifically for Windows users.

Bundled with U.S. Robotics Installation Essentials CD-ROM and Quick Installation Guide.

Supports regulatory and safety standards. Conforms to FCC Part 15 & Part 68, UL 1950-3 and C-UL.

Easy installation and high performance with Windows operating systems. PCs running Windows 95, 98, 98 SE, 2000, or Me detect and install the modem automatically.

56K¹ PCI Software Modem

Includes V.90 56K ITU standard

The World Wide Web offers PC users a range of resources no one could imagine only a few years ago. But to see the detailed graphics, hear the near CD-quality sound built into today's most advanced sites, or to telecommute efficiently, you need 56K technology.

The U.S. Robotics® 56K PCI Software Modem gives fast downloads for a more productive, rewarding online experience while minimizing the cost of the modem hardware.

This modem features simple Windows Plug and Play installation. Just slide it into any PCI slot inside your PC, and

the computer takes it from there — a few clicks, and you're ready to go online. There's no need to set DIP switches or type in complicated commands. Plus, the PCI connection provides more bandwidth than traditional ISA modems for better performance with audio and video applications.

And of course, the 56K PCI Software Modem is software upgradable. As U.S. Robotics makes new features and enhancements available, you'll be able to download them as easily as copying a file.

1. Capable of receiving at up to 56 Kbps and sending at up to 33.6 Kbps. However, download speeds may be lower due to varying line conditions. Download speeds in the U.S. and Canada are limited to 53 Kbps. Requires compatible phone line and server equipment. See www.usr.com for details.

Plug and Play Compliant

- Automatic COM port and IRQ assignment
- Fully compliant with:
 - Windows Me
 - Windows 2000
 - Windows 98/98 SE
 - Windows 95
- ACPI 1.0 compatible

Standards and Protocols Supported

- V.90 56K ITU standard
- V.34 33.6 Kbps ITU standard
- Compatible with ITU and Bell standards from 56 Kbps to 1200 bps
- V.42/MNP 2-4 error control, V.42 *bis*/MNP 5 data compression
- Fax: Class 1 Group III 14.4 Kbps send and receive

BVRP Fax and Data Communications Software

- Send faxes from within any Windows application
- Send and receive while

running other applications

- Delayed and broadcast sending
- Fax forwarding
- Caller ID and distinctive ring support (requires service from your local phone company)

Minimum System Requirements

- PC with available PCI (2.1 or higher) slot
- Windows Me
- Windows 2000
- Windows 98/98 SE
- Windows 95
- Analog phone line
- V.90 downloads require phone line and Internet Service Provider or corporate host site compatible with V.90 standard

Windows Compatibility

- Windows drivers automatically install and configure the modem for maximum performance
- Communicates with virtually any modem or fax device (Windows-based or not)
- PC 99 compatible

Package Contents

- U.S. Robotics 56K PCI Software Modem
- RJ11C phone cord - 7 feet (2.16m)
- U.S. Robotics Installation Essentials CD-ROM
- Installation Guide

Warranty

1-year limited warranty from date of purchase

Product No. USR5600

Regulatory Approvals

- FCC (Part 15)
- FCC (Part 68)
- UL1950-3 and C-UL
- ICES-003
- CS-03
