

Key Benefits

Free long distance phone calls. Included Net2Phone software lets you make free phone calls within the U.S. and Canada, economical international voice calls over the Internet, send voice e-mail, enjoy voice chat.²

Make outgoing calls while online. No need to drop your Internet connection to make a phone call with your telephone connected to the modem.

Online call notification. Pop-up window shows you who's calling, while you're online; you decide whether to take the call or stay connected.³

Easy installation. Includes step-by-step video demonstration on installation CD included in package.

Designed to work exclusively with the Windows operating system. Your PC recognizes the modem for easy installation and operation.

Advanced line probing technology. Finds the most efficient path for each connection; faster downloads, fewer dropped calls.

56K¹ Internet Call Modem

PCI faxmodem with advanced voice features

The U.S. Robotics® 56K Internet Call Modem adds sophisticated online call management and economical Internet voice call capabilities to a powerful, easy-to-use internal faxmodem.

You're in control of your time online. When an incoming call arrives, a pop-up window tells you — you decide whether to end your Internet connection and take the call, or ignore it and stay online.

You can make live, real-time, full-duplex phone calls while you stay online, with Net2Phone Internet voice call software (included at no additional cost on the installation CD packaged with the modem). It's just like making a traditional long distance call, but at a lower cost — calls to anywhere in the U.S. and Canada are free! With the telephone connected to your modem, you can call any phone in the world, over the Internet. Or you can send faxes, call another PC, send voice e-mail or enjoy live voice chat, over the Internet as well. And because we've built advanced voice call functionality into the modem, you can speak and listen through your telephone instead of your computer speakers, for higher sound quality.

Plus, advanced line probing technology finds the "potholes" in your V.90 connection. It tells your service provider's equipment how to avoid the conditions that cause slowdowns and dropped calls. So the latest weather maps, live audio broadcasts, even streaming video come to you at the highest speed possible on your line.

Even first-time modem users will find the 56K Internet Call Modem simple to install. All the necessary modem software loads itself from the multimedia installation assistant (on the installation CD). A live action video demonstration then shows each step of the hardware installation procedure.

The U.S. Robotics *Connections*[™] CD, also inside the modem package, includes more than just basic modem software. It's jam-packed with fax and Internet access software; complete and sample programs for work, home and entertainment. The *Connections* interface makes exploring and using its features quick and easy.

1. Capable of receiving at up to 56 Kbps and sending at up to 31.2 Kbps. Due to FCC regulations on power output, receiving speeds limited to 53 Kbps. Actual speeds may vary. Requires compatible analog phone line and server equipment. See www.usr.com/56k for details.
2. Your regular internet service provider charges apply. Net2Phone service requirements apply, including registration for U.S. and Canada calls and prepayment to establish account balance for other international calls.
3. Requires Caller ID and Call Waiting service from your phone company.
