

56K* Faxmodem PCI for Windows

PCI faxmodem with advanced voice features

KEY BENEFITS

Designed to work exclusively with the Windows operating system

Your PC recognizes the modem for easy installation and operation.

Advanced line probing technology

Finds the most efficient path for each connection—faster downloads, fewer dropped calls.

Software upgradable

Protects your investment—a few clicks bring you new features and enhancements.

Model No.
5699A

The U.S. Robotics® 56K Faxmodem PCI for Windows brings home and small business users a modem with reliability worthy of the world's best-selling modem brand at a price that even your most cost-sensitive customer will appreciate.

The modem's PCI interface introduces itself to your PC without any effort from you. Then, the Windows operating system makes the necessary adjustments to get you going.

Advanced line probing technology finds the "potholes" in your V.90 connection. It tells your provider's equipment how to avoid the conditions that cause slowdowns and dropped calls. So the latest weather maps, live audio broadcasts, even streaming video come to you at the highest speed possible on your line.

Even first-time modem users will find the 56K Faxmodem PCI for Windows simple to install. All the necessary modem software loads itself from the Installation CD included in the package. A live-action video demonstration then shows each step of the hardware installation procedure. The user can also either follow the Quick Install Guide or even print out the instructions from the CD to follow during installation.

The *Connections*™ CD, also included, is jam-packed with fax and Internet access software, complete with simple programs for work, home, and entertainment. The *Connections* interface makes exploring and using its features quick and easy.

56K* Faxmodem PCI for Windows

U.S. Robotics helped you get on the Internet, and we're keeping you connected with cutting edge technology. We're proud of our role in the history of the Internet, but even prouder of our role in the future – broadband, wireless, and beyond. Our entire team, from customer support to engineering, is dedicated to keeping people in contact worldwide – with information, entertainment, and each other. Find out more at www.usr.com.
